cara Information

* The screw channel's exit hole is marked with a raised indication, e.g. using wax. cara I-Flex with an Access guide or Angulation Guide shall be used for all analogues so as not to exceed the maximum angulation of the screw holes.

** cara I-Bridge can be designed virtually with other scanbodies than NT Trading or Medentica. Please contact Technical Hotline for further information.

cara I-Bridge new connection

We can now manufacture cara I-Bridge to any implant system. Please contact Customer Service for more information about how to order a cara I-Bridge new connection. A great opportunity that help customer to get a great prosthetic solution to all patient situations.

Screw-Vent® is a registered brand of Zimmer Dental, USA. Thommen® Implant System are trademarks of Thommen Medical Group.

All trademarks and company names are the property of their respective owners.

Digital Design

The customer designs cara I-Bridge digitally, using their own experience and adapting to the patient's specific requirements virtually. The file is then uploaded and sent for production. This flexibility reduces time and cost for both laboratories and clinicians.

The customer can use either 3Shape, sending the file via Heraeus Kulzers' inbox, or via open STL-files uploaded to Meeting Point.

The leading scanners/software in the market; 3Shape, Exocad and Dental Wings can be used for the design.

For more information, please visit www.cara-kulzer.com

Design recommendation for 3Shape

The customer will need the following to be able to start

- 3Shape DentalManager 2013, Ver. 2.8.8.8.
- Updated library for the abutments in 3Shape from Heraeus Kulzer.
- Scan body; We support only scanbodies from Medentica and NT Trading in our material file. If other scanbodies are used please contact Technical Hotline for information.

Our specialists in the field will be pleased to provide you with information and service.
